

100 - 1 = 0

What's "100-1"?

Any junior high school student could do the math right away. Of course it's 99, but I recently saw this equation in a book : "100-1 = 0."

Kenichiro Tanaka, Executive Chef of the Imperial Hotel, says that 100-1 = 0. This equation expresses Mr. Tanaka's pride and his attitude toward his work. As a chef, Mr. Tanaka says, "Cooking is something that is done full-heartedly. In the culinary world, he says, a single cut-corner can ruin the flavor entirely; or in other words, reduce it to "zero."

I believe that everyone has his or her own role in the classroom, at school, or in club activities. If you are half-hearted or if you think it's fine to be lazy, your results will reflect that.

But even through June, all 114 of you have been working very hard at everything you've been doing. If even one person had cut corners or had a weak will to accomplish their tasks, the classes, student councils, and club activities would not have been as fulfilling as they were.

The concept of "everyone working together" and "everyone fully trying" is like the world of cooking, where 100 - 1 = 0. Living in school with all of you, I strongly feel that each of you should take your role seriously and that this is the most important thing of all.

There are less than two weeks left in the first semester. Next, we will start working on the Sports Festival. Preparations will continue throughout our summer vacation. I expect every one of you to work on it with this mindset of "100 - 1 = 0".

Principal Koshun Hirozawa

1st grade Botanical Observation• Local excursion

On Monday, June 5, a plant observation event was held with members of the Anamizu Town "Donguri no Kai" as instructors. Under a sunny sky, the group spent about an hour walking around the Oyako Fureai-mura course, taking notes, photos, and videos of plants with their Chromebooks. They were also able to find the town flower "Sasayuri" in bloom, providing a good opportunity to learn about the nature of the local Anamizu area.

On Friday, June 16, we divided the group into four groups for a walk in the Morohashi, Nakai, Anamizu and Anamizu district. The participants were guided and briefed by satonavi and members of the Chamber of Commerce and Industry.

We would like to organize what we've learned through this study into our local town map.

3rd grade Town revitalization / Crested Ibis

On June 5 (Mon.) and 9 (Fri.), third grade students had seven people who have moved to Anamizu as guest teachers to provide clues for the revitalization of the town's community. We would like to learn from their stories to make our town livelier.

Also, on Monday, June 26, Mr. Genichiro Miyashita was invited to a study session on the Japanese crested ibis. He spoke about the time when there were crested ibis in Noto, the breeding efforts of the last crested ibis, "Nori," and the crested ibis fan club, which currently has 545 crested ibis on Sado Island and is working to get them flying again in Noto's sky. We were able to feel his "ibis love" through his lecture.

2nd grade Manner class for career day

On Tuesday, June 27, the second graders had a lecture on manners before the summer vacation Waku-Work work experience (career day). They practiced greetings and talked about the importance of working.

On July 27 (Thu.) and 28 (Fri.), the students will be divided into groups to experience work at various businesses in town.

All Noto tournament

Boys basketball : 1st round close match

Anamizu35-68Midorigaoka

Girls basketball : 1st round Anamizu61-24Shika
