

## Declaration of youth ! ~Full throttle acceleration~

The principal's speech at the sports festival. I tried to keep it as simple as possible, but I wanted to express my thoughts as hard as I could. With this in mind, I spoke to the entire school as following:

It was such a beautiful day.  
What was all that rain over the weekends?  
There is nothing to be afraid of today.  
Please move your bodies as much as you can.  
And please cheer your fellow students as well.  
As the slogan says, the engine is running at full throttle.  
Let's all exceed your limit!

The Sports Festival began, and all the events were truly exciting. The students were enjoying each event to the fullest. Students cheered loudly for these athletes regardless of their grade. And they praised each other regardless of whether they won or lost. All the students exceeded the upper limit of what the slogan says.

I thought to myself as I watched the event that in order to grow and develop yourself, you need to embrace new experiences. This means engaging with people face to face and interacting with them sincerely.

Hands on experience is when you physically engage things and take action. In that moment, you are fully immersed in the "now".

On the other hand, theoretical experience is what you gain through this hands on experience.

We learn from our experiences, and when we willingly keep learning, it can change who you are. It is only through "experience" that one can gain something.

Failure and success cannot be understood without experience. In other words, the only way to find out is to try it for yourself. It is only through failing again and again that we can become successful.

Your experiences determine who you are and shape your life story.

This year's Sports Festival was a wonderful physical and mental experience that you can all talk about when you become adults.

Thank you for showing us your spirit!

Principal Koshun Hirozawa

## Student council starts ! !

At the recent student assembly, the activity plans of the executive committee and each committee were approved, and the second semester student council has started. The slogan of the Student Council for the second semester is "Let's Try! The slogan "Let's Try" means "to make a drastic change for the better in a current situation, condition, or circumstance. During the Student Council elections, the Student Council Executive Committee and the chairpersons of each committee expressed their goals and their enthusiasm in front of the whole school, such as "I want to improve greetings" and "I want to create better classes with everyone. The second half of the student council will be led by the second-year students, and I look forward to their future activities to carry on what the third-year students have built and make the Anamizu Junior High School Student Council even better. We support your efforts.

### September 24 (Tue) Anachu Sports day

Anachu Sports day, which had to be postponed due to rain, was successfully held on Tuesday, the 24th, under the refreshing clear autumn sky. The event started with the pledge of allegiance by Mr. Mae, the leader of the Red team, and Mr. Tanaka, the leader of the Blue team, and all the inter-group competitions were very exciting.

The slogan for this year's athletic festival was "Declaration of Youth! ~The students showed their true "youth" in the athletic competitions. There were many wonderful scenes of students enthusiastically competing in competitions, cheering with all their might, and getting into the spirit of the event by forming a circle.

As a special event this year, a tug-of-war match between 3rd grade students and their parents was also held, which was a lot of fun. Thank you very much to all the parents who participated. The Cultural Festival will be held on Saturday, the 26th of this month. Parents, please come and see the students in action.

### Requests Regarding the Use of Tablet Devices

All schools have confirmed the use of tablets at home. We would like to reiterate that the tablets are loaned by the town and their use is limited to learning.

Unfortunately, however, some students are using the tablets for purposes other than learning, such as playing games and chatting. We have also seen some students treat their tablets carelessly.

Since tablets are important tools to support learning, we ask that you teach your students how to use them properly and to take good care of them at home.
